Product information

- No nutcracker effect
- Facilitates communication between horse and rider

Advantages of the rings:

- The movable rings on the water snaffle automatically bring the bit into the correct position in the horse’s mouth when the reins are taken up.
- The free-moving rings allow the horse to slightly adjust the bit’s position in its mouth on its own, which stimulates chewing and leads to better acceptance.
- For young horses, as well as for inexperienced riders, the water snaffle should always be the first choice.

Stübben STEELtec Quality:

- No sharp edges that could injure the horse’s mouth
- Long-lasting durability thanks to carefully selected materials
