Put an end to summer eczema gently and effectively with Officinalis "THE" Shampoo

- Cleanses, nourishes, and protects with natural ingredients
- For summer eczema and inflammatory skin conditions
- Also suitable for horses prone to allergies
- Moisturizes the skin
- Strengthens the skin’s resilience
- Soothes itching and promotes wound healing
- contains only natural active ingredients

Summer
eczema is a widespread problem during the warm months, as many horses are extremely sensitive to bites from black flies. These bites trigger intense itching, and small pustules form. The horse begins to rub itself, not only rubbing away the hair but often also

Product information

scratching the skin raw. With DER Shampoo, summer eczema can now be treated gently yet effectively.

Natural Vitamins Instead of Harsh Chemicals

To avoid further irritating the skin—which is already compromised by constant rubbing due to summer eczema—DER Shampoo contains no chemical ingredients or harsh surfactants. Instead, it combines vitamins E and B5 to hydrate the skin and make it more elastic. The antioxidant effect of vitamin E also helps restore the skin’s natural structure and strengthen its resilience. Peppermint extracts have a refreshing and soothing effect on itching. The essential oil of Italian strawflower (Helichrysum) has antimicrobial properties and thus aids in wound healing. Because it contains no chemical active ingredients, DER Shampoo is extremely well-tolerated and can be used safely over an extended period even on horses with allergy-prone skin.
