Chest Plate for the "Rope" Short and Long Strap

Product information

To improve pressure distribution on the sternum, the "Rope" short and long webbing harnesses (Item Nos. 146 05 and 146 06) can also be fitted with an abdominal plate. The inside of the abdominal plate is made of memory foam. This is a type of soft gel material that conforms to uneven surfaces. This relieves pressure on cartilage or small bumps, as the unevenness is compressed into the foam and the pressure is redistributed around it. After use, the memory foam returns to its original shape. Includes a D-ring.

Additional Information

Size: One size fits all
