Color:	blue
Features:	Breathable, Moisture-absorbing
Filling:	50 g
Blanket Sizes:	140 cm

This Horseware® Dry Liner (50g Light) is every horse owner's dream blanket! It dries sweaty horses quickly and efficiently—saving you time and effort. Designed to eliminate the need for a separate moisture-wicking cooling blanket after a workout, simply attach this liner to your Horseware® turnout or stable blanket, and it will dry your horse while they enjoy their downtime. No more waiting for your horse to dry completely before turning it out to pasture—ensuring its full comfort and giving you peace of mind.
The breathable liner features a sophisticated three-layer fabric construction that creates the perfect conditions for excellent

Product information

moisture evaporation, drying your horse even when fully covered without creating a damp environment inside your turnout blanket. Here’s how it works:

- Layer 1: A moisture-wicking, ultra-soft polar fleece supports your horse’s natural ability to wick moisture away from the skin while providing ultimate comfort.
- Layer 2: 50 g of High Loft Fiberfill is layered in the middle to further wick moisture generated by your horse’s body heat away from your horse, which aids in moisture evaporation and keeps your horse warm.
- Layer 3: The top layer consists of a 3D “air mesh” for improved air circulation, which maintains more air space within its fabric construction, retains heat, and further aids in moisture evaporation, preventing your outer blanket from getting damp or your horse from feeling a chill.

With two leg openings for freedom of movement and a simple, secure Velcro closure in the front, along with clips on the back for added security, this liner is a must-have for your blanket collection!Of course, this liner can also be used on its own as a cooling blanket.
