- Supports the recovery of stressed joints
- Promotes a willingness to move
- Devil’s claw combined with other high-quality herbs

Nutrients and herbs to support stressed joints

Antimal Artiglio Devil’s Claw by Officinalis is a dietary supplement for horses that offers a high-quality combination of joint nutrients and herbs. Ingredients such as glucosamine, devil’s claw, and black currant support stressed joints.

Product information

The unique combination of herbs and glucosamine makes Antimal Artiglio one-of-a-kind. Glucosamine is an important component of healthy cartilage, tendons, and ligaments. It helps form joint lubricants and protects against wear and tear. It promotes mobility, and many horses regain their joy in daily exercise. The addition of chamomile makes this dietary supplement particularly gentle on the stomach.

General Information:

Devil’s claw is traditionally used as an alternative to pain relievers for joint problems. For horses with musculoskeletal issues (e.g., osteoarthritis, spavin, laminitis, and other inflammatory joint diseases), we recommend consulting a veterinarian.

Disclaimer:
Please note that all of our herbs and products are purely dietary supplements and not veterinary medicines. Our products are not a substitute for a veterinarian or animal naturopath. They are intended solely as a supportive therapy.
