Size of Riding Gloves:	11

Incredibly warm—no more cold fingers in winter—that's the WYNNE, by far the warmest riding glove in the ROECKL SPORTS collection. Thanks to its sophisticated design and state-of-the-art high-tech materials, this model offers reliable protection against the cold for your hands—even on freezing days at the stable and during long rides—while also providing excellent grip and a high degree of sensitivity on the reins. But that's not all it does—this glove is also pleasantly lightweight, fluffy and soft on the inside, and highly elastic for maximum finger mobility. But first things first: The innovative PrimaLoft® Gold insulation with Cross Core technology is what provides reliable protection against the cold. The aerogels it contains ensure extremely high heat retention with

Product information

exceptionally low weight and volume—in other words, the soft insulation is ultralight and provides maximum warmth without adding bulk. Bitingly cold wind doesn't stand a chance thanks to the highly breathable yet completely windproof ROECK-PROOF softshell on the back of the hand. And the stretchy, breathable palm material provides a reliable grip, allowing for precise rein control and a sensitive connection to the horse's mouth. In addition, a silky-soft inner lining and the long, slim design—with a snug-fitting knit cuff and an elastic wrist strap—ensure that no heat escapes. Speaking of design: The ROECK-exclusive, optimized seam placement on the index finger—COMFORT-CUT—provides added comfort. Practical and, for a riding glove, a given: The WYNNE can be machine-washed at 30° Celsius without any problems. **Back of the hand:** ROECK-PROOF® Ural
Palm: Elastic Pore Grip
Features: COMFORT-CUT, EXTRA WARM, knit cuff, elastic strap with Velcro closure, PrimaLoft® Gold insulation with CrossCore technology **Gender:** Unisex
