Soybean extraction meal provides 50% protein with an amino acid profile that is beneficial for horses.

Product information

Its use is recommended for horses with PSSM2 / MFM.
Since the high protein content is not entirely harmless, it is essential to consult our team of experts regarding dosage and ration formulation if in doubt.
Feeding Recommendation:A low-carbohydrate but high-protein feed to be fed in combination with—or as a substitute for—grain-based feeds.Depending on the ration, 30–50 g per day per 100 kg of body weight.
