Dermaprotec Ravene Ointment 250 ml

When it comes to skin care, DERMA PROTEC is the cream you should always have with you.

DERMA PROTEC forms a barrier against external influences or repeated mechanical stress on the fetlock area, withers, girth area, or other skin areas (mudd).

The formula and texture protect the affected areas.

DERMA PROTEC dries and cleanses the affected skin surface and is water- and dirt-repellent.

Product information

Directions:

Apply DERMA PROTEC directly to the affected area. Repeat the application at least twice daily until the problem has resolved. It is recommended to clean the affected area before applying DERMA PROTEC. Avoid contact with the eyes. For best results, store Dermaprotec at room temperature (between 8 and 28°C).

Ingredients: Chlorhexidine, sulfur, zinc oxide, and calendula
