Saddle Strap Sizes:	130 cm

The IKONIC girth with carabiner, crafted from the finest Italian leather with a removable fur pad.

The anatomically shaped IKONIC girth, with its **wide cutouts**, conforms perfectly to the horse's belly, thereby enhancing the horse's comfort and safety. The open design around the elbows provides the horse with **optimal freedom of movement**.

A central attachment ring allows for easy attachment of auxiliary reins. The carabiner is designed for fastening the breast collar.

In addition, a protective cover has been developed for the elastic at the end of the girth. This prevents the elastic from wearing out too quickly due to external factors.
