Currently out of stock.

Size of the bit:	12.5 cm
Thick bridle:	20 mm

The bits from the Inno Sense collection can be used for all horses, but are particularly suitable for ponies, young horses, and horses with sensitive or small mouths. The plastic used is FDA-approved, which means it is non-toxic and contains no plasticizers. Inno Sense bits are available with 4 different mouthpieces that can be combined with all shanks. Horses ridden with an Inno Sense bit follow the rider’s hand easily and quickly accept the bit.Mullen: The Inno Sense Mullen is a straight bar that bends slightly forward. This bit is made of elastic plastic. It has a rigid core, so the Mullen bar is not as flexible as the Flexi Soft, but it feels soft.
