Art.Nr.: EQX-Kot- / GTIN: 4262365610737 / manufacturer: EQX

85,90CHF / Piece

incl. 8,1% VAT plus Shipping

Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Product Description

The Power Trio for the Gut

EQX Anti-Watery Manure is a natural dietary supplement that supports your horse’s gut function, stabilizes digestion, and helps with the following issues:

- watery feces
- diarrhea
- bloating
- changes in stool consistency (too soft)
- after medication
- After deworming or antibiotics
- when moving from the barn to pasture and vice versa
- When changing the diet

Product information

Humic acid:

A remedy for the gut

EQX Anti-Watery Manure harnesses the power of humic acid (Leonardite)—crucial for your horse's intestinal health. But what does humic acid do?

- Supports digestion
- Strengthens the immune system
- Promotes nutrient absorption
- binds harmful substances and toxins
- Microbiome Power with Apple Pectin and Psyllium Husk

With apple pectin and psyllium husks, EQX Anti-Diarrhea supports your horse's microbiome. Apple pectin stabilizes the manure and promotes healthy gut flora, while psyllium husks form a protective mucus layer and bind excess fluid—ideal for digestion and well-being, even in cases of constipation and diarrhea.
Patience pays off!

It's important to be patient and feed the product for at least 30 days. Our product naturally restores gut health, which takes some time. However, it is not suitable for acute cases.
Tip for Known Reactions

If your horse has a history of reactions—such as to the transition from the stall to pasture, deworming treatments, or a change in feed—start feeding the product at least 30 days in advance to prevent extreme intestinal reactions (such as watery manure, diarrhea, or bloating). EQX Anti-Watery Manure strengthens the intestinal tract, rebuilds the gut, and restores it long-term.

Usage and Dosage:

Adult horses: 2 measuring spoons once daily (620g package lasts for 31 days)
Foals and young horses: 1 measuring spoon once daily
For best results, feed the product for at least 30 days. If you're feeding mash, let it soak first and mix in the product just before feeding to ensure that the active ingredient dissolves in the gut rather than in the water, thereby achieving the best possible effect. Otherwise, simply sprinkle it over dry feed (e.g., muesli). You can feed the product as a short course of treatment or on a long-term basis, depending on your horse's needs.

Ingredients

Composition:

Leonardite (cellulose-lignin-carbon isolate; containing humic acid), yeast cell walls (rich in MOS and beta-glucans), ground Pleurotus ostreatus, psyllium husks, apple pectin, partially hydrolyzed guar gum

Analytical Constituents:
Crude
protein (10.9%), crude ash (6.4%), crude fiber (10.6%), crude fat (5.1%), calcium (Ca) (0.2%), potassium (K) (0.8%), magnesium (Mg) (0.1%), sodium (Na) (1.1%), phosphorus (P) (0.3%), starch (4.6%), sugar (1.1%)
Sensory additive (per kg):
Microcrystalline cellulose E460 (160,000 mg)
Zootechnical additives (per kg):
Saccharomyces cerevisiae CNCM I-1077 4b1711 (1.0×10^{12} CFU)

Notes

Administer veterinary medications at least 2 hours apart from EQX Anti-Fecal Water. Fecal color may change. Made in Germany.

Anti-Doping and Medication Control Rules

In accordance with the anti-doping and drug testing regulations of the German Equestrian Federation (DEV), this product has a recommended withdrawal period (from the last administration of the product until competition) of 48 hours. According to the FEI (Fédération Équestre Internationale), this product is not relevant to doping.

Storage Instructions: Do not store above 25°C. Keep the package tightly closed and store in a dry place. Use within 6 months after opening. Do not heat the product.
