Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Features:	Waterproof
Color:	black
Filling:	50 g
Blanket Sizes:	130 cm

Stylish outdoor blanket for Icelandic horses!
This outdoor blanket, with 50 g of filling, is wind- and waterproof (4,000 mm water column, breathability 3,000 g/sqm in 24 hours) as well as tear- and abrasion-resistant thanks to its 1,200 DEN ripstop polyester. For an optimal fit, the chest closure features Velcro and two rings for individual adjustment. The cross-strap design and tail flap prevent the outdoor blanket from slipping on the Icelandic horse and ensure a secure fit.
The blanket is suitable for “normal” or “larger” Icelandic horses. The blanket has a more generous cut in the chest area, as Icelandic horses require more room in this area due to their breed characteristics. This fit can be further adjusted individually using the two rings.

• “Island” outdoor blanket with 50 g filling
• Generously cut in the chest area, specifically designed for Icelandic horses
• Wind- and water-resistant

Product information

• Tear- and abrasion-resistant
• Smooth inner lining
• No back seam and with a raised withers
• Chest closure with Velcro and two rings
• Cross-strap design, large tail flap, and low-set tail strap
• Option to use leg straps
• Loops for attaching a separately available neck piece (Item No. 463 40)

Additional Information
Size: 120 cm (height at withers approx. 135 cm), 130 cm (height at withers approx. 145 cm)
Filling: 50 g
Color: black

Washing Instructions
Please follow the care label instructions.
Before each wash cycle, fasten the Velcro closures and place the blanket in a thick bag. This prevents the fasteners from hitting the washing machine drum during the wash cycle, which could cause them to burst open and rust more quickly. Always wash outdoor blankets with a detergent designed for outdoor blankets. This helps minimize damage to the blanket's lamination. Wash the blanket at 30°C on the delicate or gentle cycle. Subsequent waterproofing is not necessary, as the waterproofing of outdoor blankets is achieved through a laminate on the back of the fabric, and waterproofing treatments can damage this laminate.

We recommend having the blanket professionally cleaned.
