Product information

Color: brown

The perfexxion II is the **perfect combination** of **sportiness, climate control**, and **safety**. uvex product developers and designers have poured all their expertise into the further development of this riding helmet: One of the safety-related innovations is the outer shell, which extends around the back of the head. Extending it over the nape ensures maximum safety—even for the back of the rider’s head. A cutout for the ponytail ensures a comfortable fit. This is where innovation becomes visible: Thanks to the new, sleeker helmet shape, the perfexxion II is **even lighter** than its predecessor and **ergonomically** tailored to the demands of competitive riding. This riding helmet offers protection that is as lightweight and comprehensive as ever before.

The new uvex pentagon dynamic ventilation combines forward-thinking design with **optimal climate control**. By enlarging the existing air channels and adding an additional one—in combination with the innovative honeycomb structure—**airflow** has been **significantly improved** compared to previous systems. Wearing comfort is further enhanced by the interior features: **washable pads** made of soft-touch material and memory foam, as well as the 3D-IAS size adjustment system, guarantee an optimal fit on any head at all times. The new perfexxion II makes the rider almost forget they’re wearing a helmet.
