Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Color:	black
Material:	Leather
Saddle Strap Sizes:	125 cm

The angular cut and anatomical shape of this IKONIC girth keep the saddle in place and provide the horse with optimal comfort thanks to greater freedom of movement.

Thanks to its cutout design at the elbows, the IKONIC girth allows the horse greater freedom of movement. The wider, padded center panel ensures better pressure distribution across the chest. A center D-ring and two small side D-rings allow the rider to quickly attach a rein.

Product information

A square cutout in the leather at the level of the elastic straps—aligned with the leg axis—facilitates contact with the horse. Stainless steel roller buckles on triple elastic straps make it easier to tighten the girth.
