Art.Nr.: ES311400575010 / manufacturer:

16,95CHF

incl. 8,1% VAT plus Shipping

Currently out of stock.

Nose and neck guard made of long-pile microfiber.

Microfiber quickly absorbs dust and, above all, moisture, allowing it to evaporate rapidly. This material can be washed as often as needed at temperatures up to 90 °C to effectively combat odors and pathogens. Microfiber is thus a durable and low-maintenance alternative to woven fabrics and lambskin. Please note that you should not use fabric softener when washing.
