ZEDAN Mane Shine gives the mane, coat, and tail an exceptional, long-lasting silky shine with plenty of volume!

Targeted application of Mane Shine improves combability and protects long hair from tangling. Grooming is made much easier thanks to the mane spray's dust- and dirt-repellent properties. Its soothing and anti-inflammatory effects help balance the skin and alleviate dandruff and skin irritations. Directions for Use Apply Mane Shine to a clean horse, let it dry, and brush through lightly. For heavily soiled horses, wash them first and apply Mane Shine while the coat is still damp. Spray the mane and tail thoroughly, detangle, and comb through carefully. Ingredients The innovative combination of active ingredients—provitamin B5 and natural vitamin E—strengthens and improves the structure of the hair and skin. The mane spray is gentle on the skin, pH-neutral, and has been successfully dermatologically tested.
