Gentle cleansing for the coat, tail, and mane. Especially for grays, piebalds, and palominos. Discoloration disappears, revealing a clean coat once again. KERALIT Schimmelschwarz is based on a mild baby shampoo from human cosmetics that has been optimized for animal skin by veterinary dermatologists. Thanks to its high content of medical-grade activated charcoal, dissolved dirt is immediately bound and can be easily rinsed away. The activated charcoal's extremely high surface activity ensures a gentle yet powerful cleansing effect. This allows for the complete elimination of irritating chlorine compounds and bleach. KERALIT Schimmelschwarz is therefore ideal for sensitive animal skin. It is also perfectly suited for dogs. The shampoo is highly effective at neutralizing odors. KERALIT Schimmelschwarz contains **no** dyes and therefore leaves no blue stains on the coat or hands. It is extremely economical to use. Charcoal has been used for hundreds of years as a cleansing aid for mold, human hair, and teeth. KERALIT Schimmelschwarz is completely free of chlorine, silicones, bleaching agents, brighteners, dyes, and fragrances. Ingredients: anionic surfactants 5–15%, nonionic surfactants
