| Seat size: | 17 (56–79 kg) |
| Chamber width: | 35 |
| Pre-cut: | A+4 / AA: +4 cm |
| Pillows: | LPF (wool pillow) |

**RUBINO - A Masterpiece Featuring AS-X Technology** The Rubino AS-X saddle features a saddle tree equipped with the revolutionary new AS-X technology. This technology was developed by combining two technologies: the “Adaptive System” and X-Technology. The “Adaptive System” is the only shock-absorbing system that allows for axial and torsional-lateral movement of the tree. Thanks to its geometry, X-Technology with injection-molded membranes, and the patented “Adaptive System,” it is able to fully follow the horse’s movements and provide the rider with maximum stability. The front part of the saddle is designed to bring the rider as close to the horse as possible, while the rear part, with its large injected membranes, offers maximum stability. The design, developed specifically for maximum flexibility, allows the horse to fully express its athletic abilities. This saddle is available in two depths: MD (semi-deep) for riders who prefer a centered position, and MF (semi-flat) for those who desire more freedom of movement. The tapered design of the large and small saddle flaps enhances communication between horse and rider. The non-sewn pommel pads allow the sweat flaps and cushions to better conform to the horse’s anatomy without restricting its movement. Thanks to its five different pad options, the Rubino AS-X saddle adapts to any horse’s build and all of the rider’s needs: LPF (integrated, non-integrated, and FSF—non-integrated) and latex (integrated and non-integrated). **NOTE:** The images shown are standard illustrations of the respective saddle model. Colors, decorative stitching, and product-specific details may differ from the actual product delivered.
