Product information

Thick bridle:	20 mm
Material:	Plastic

If your horse has a strong drive forward, the three-ring bit with a flexible shank may be the ideal choice. The stronger contact is well-suited for horses that are difficult to control and tend to raise their heads.

At the same time, the bit ensures greater comfort for sensitive horses and those with sensitive mouths. Made from high-quality thermoplastic, our NATHE bits are not only hypoallergenic but also temperature-resistant and dimensionally stable.

On this model, the side-mounted bit discs further help protect the corners of the mouth. The slight tongue freedom provided by the flexible shank contributes to subtle communication.
