Size of the bit:	13.5 cm
Thick bridle:	20 mm
Material:	Plastic

This 2.5-ring bit from Trust is a model with a plastic shank. The mouthpiece is slightly curved forward and has a rigid core, but the plastic surrounding it gives the bit a soft feel. The synthetic materials used are FDA-approved, meaning no plasticizers were used and everything is non-toxic to both humans and animals. The 2.5-ring cheek piece offers the rider numerous attachment options that can either reduce or increase the leverage. This allows the bit’s bite to be individually adjusted to the needs of the horse and rider. The lower the rein is attached, the stronger the leverage becomes. A 2.5-ring bit is primarily used for horses that resist the hand strongly during show jumping.

Product information

Note:

Since the material is soft, signs of wear from the horse’s teeth may appear. These do not constitute a quality defect.

Features

-
- Thickness: 20 mm
- Bar slightly curved forward
- Rigid core
- No plasticizers
