Thick bridle:	20 mm
Size of the bit:	12.5 cm
Material:	Plastic

This 2.5-ring bit from Trust is a model with a plastic shank. The mouthpiece is slightly curved forward and has a rigid core, but the plastic surrounding it gives the bit a soft feel. The synthetic materials used are FDA-approved, meaning no plasticizers were used and the product is non-toxic to both humans and animals. The 2.5-ring cheek pieces offer the rider numerous attachment options that can either reduce or increase the leverage. This allows the bit’s sharpness to be individually adjusted to the needs of the horse

Product information

and rider. The lower the reins are attached, the stronger the leverage. A 2.5-ring bit is primarily used for horses that resist the hand strongly during show jumping.

Note:

Since the material is soft, signs of wear from the horse’s teeth may occur. These do not constitute a quality defect.

Features

- Thickness: 20 mm
- Bar slightly curved forward
- Rigid core
- No plasticizers
