Currently out of stock.

Material:	Plastic
Size of the bit:	13 cm
Thick bridle:	20 mm

This standard bit with a flexible shank ensures ease of tongue movement. It sits particularly calmly in the mouth and is therefore also suitable for horses with contact issues. The bit’s unique mechanism: The large rings cannot pivot outward. This framing effect makes riding turns significantly easier because the horse is kept within a defined frame. At the same time, the small ring secures the large ring, limiting the movement of the mouthpiece. The result? The influence on the tongue is immediate, allowing for precise

Product information

control. The bit provides comfort that satisfies even sensitive horses with sensitive mouths. Made from high-quality thermoplastic, our Nathe bits are not only hypoallergenic but also temperature-resistant and dimensionally stable.

- Flexible shank with slight tongue freedom
- Large rings cannot swing outward, which aids in riding turns
- Small ring secures the large ring, allowing the mouthpiece to slide only slightly; this results in a more direct action on the tongue
- Stays stable in the horse’s mouth; suitable for horses with contact issues
- Protects the corners of the mouth with bit discs
- With steel core

- Thickness 20 mm
- Material: Thermoplastic
- Mouthpiece bar
- Ring diameter 70 mm
