Steel1 are the new **safety stirrups** from Veredus: The stainless steel material ensures a safety stirrup with the ideal weight and unique properties. The stirrups' special shape and material **allow the foot to be quickly released in any direction**—an essential safety feature in critical situations. That's why Veredus's Research and Development department developed Steel1, the ultra-safe stirrup with a modern, clean design that is both beautiful and safe in every way.

- Inner stainless steel stirrup for durability and safety
- Offset stirrup strap eyelet
- Outer stirrup made of a special technopolymer that is flexible through 360°, for quick and safe release of the foot
- Ideally shaped footplate with a rubber insert for a firm grip
- Holes for draining sand from the soles of the boots
