For people and pets!
ZEDAN’s Natural Insect Repellent is a natural insect repellent lotion made from biodegradable active ingredients and fragrances.
Usage: Natural geraniol provides particularly effective protection against mosquitoes, flies, ticks, gnats, and other insects. The Natural Insect Repellent truly lives up to its name by soothing, nourishing, and cooling skin affected by insect bites.
Application: Apply a thin layer to exposed skin and spread evenly. Repeat as needed.
Ingredients: The secret to its effectiveness lies in plant-based ingredients and essential oils such as avocado oil, clove oil, peppermint oil, tea tree oil, vitamin E, bisabolol, and the well-known aloe vera.
