Delivery **Mon 09. Nov - Tue 10. Nov 2026**

CellaVie® Dog Collagen Booster Powder
—Cell Nutrition for Skin, Bones, and Connective Tissue. Dietary supplement for dogs

Brief Description

CellaVie® Dog Collagen Booster Powder is a customized cellular nutrient for skin, bones, and connective tissue. With an innovative combination of 85% pure collagen and 15% bioavailable Cell-K30-Nutrition® nucleotides, it specifically supports your dog's joint health and cell renewal. Simply mix it into your dog's food daily—for improved structure, elasticity, and long-lasting vitality.

Biological cellular power for healthy joints, strong bones, and supple skin

A dog's connective tissue is the supporting foundation of its body. Cartilage, tendons, ligaments, bones, and skin are subjected to daily stress and must continuously regenerate. **The problem:** For this constant cell renewal, the body requires enormous amounts of specific building blocks, and its ability to produce these on its own reaches its limits during times of stress, growth, or as the dog ages. Without these building blocks, the tissue loses its elasticity, and joint health suffers.

The solution is CellaVie® Dog Collagen Booster Powder—a highly innovative cellular nutrient that picks up right where conventional products leave off. It combines 85% pure collagen with 15% of the revolutionary Cell-K30-Nutrition® formula. The collagen provides the essential protein building blocks for connective tissue, while the added nucleotides act as "masons and foremen." They ensure that protein synthesis runs smoothly and that the collagen can be efficiently converted into the body's own tissue. Support your dog's vitality at its very root: in the cell.

5 reasons why CellaVie® Dog Collagen Booster Powder is good for your dog:

- **Supports strong joints and bones:** Collagen is a natural protein and an essential component of cartilage, tendons, and ligaments, which sustainably strengthens their structure and mobility.
- **Promotes elastic connective tissue and skin:** Regular intake naturally preserves the elasticity and firmness of the skin and all connective tissue.
- **Accelerates cell renewal:** The nucleotides it contains are the essential building blocks of DNA and RNA; they support smooth cellular repair processes in the body.
- **Optimizes protein utilization:** Amino acids from collagen are the building blocks, but it is the nucleotides—acting as "construction workers"—that enable their efficient incorporation into the tissue.
- **Guaranteed Swiss premium quality:** The product is based on decades of research by Dr. Peter Koeppel and consistently avoids artificial additives or cheap fillers

Composition & Analytical Components

Composition: Collagen 85%, Cell-K30-Nutrition® nucleotides 15%.

Product information

Analytical Components:

- **Crude protein:** 87.95%
- **Crude fat:** 0.32%
- **Crude Fiber:** 0.27%
- **Crude ash:** 0.98%

Feeding Recommendations & Usage

- **Daily feeding recommendation:** 1 measuring spoon per 5 kg of body weight.
- **Usage:** Simply mix the powder into your dog’s regular food. You can also lightly moisten the mixture with water and then sprinkle it over the food to help it bind together.
- **Special Notes:** Please always provide your dog with plenty of fresh drinking water. The powder integrates perfectly into any feeding routine (dry food, wet food, or BARF).

Storage: Store in a cool, dry place, protected from light.
