incl. 8,1% VAT plus Shipping

Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Product information

Thick bridle:	14 mm
Material:	Metal

Dynamic RS bits are characterized by the ergonomic shape of the mouthpiece. They fit particularly well in the horse’s mouth, distributing gentle pressure evenly across the tongue and the sides of the tongue, and promoting optimal chewing. Dynamic RS bits encourage horses to accept the bit more quickly.

The ergonomically shaped mouthpiece allows for faster and more targeted influence on the tongue. At the same time, Dynamic bits are very gentle on the mouth thanks to the fine, 45-degree-angled olive.

The curved shanks of the mouthpiece ensure that the bit always remains in the correct position in the horse’s mouth. The fine olive (center piece) can apply pressure directly to the center of the tongue. Reins signals are transmitted precisely to the horse. The bit fosters the horse’s trust in the rider’s hand and increases safety.
