Product information

For the barn, the trailer, the car, and the storage room. Also for your bike, purse, tent, etc. This clever strap, with loops at each end, can be flexibly attached to poles, bars, and rings wherever you like. Nothing is permanently attached, and everything is removable. Together with the ultralight, specially designed aluminum carabiner—which wraps around larger poles and handles—you'll always find a place to hang your gear. A smooth and lightweight carabiner can be easily attached and gently released without damaging your gear or yourself. The LOOP can be set up and taken down in no time.
The LOOP Flex combination holds 30 kg. Black polypropylene strap, 25 mm wide and 40 cm long, with a loop at each end. The aluminum carabiner has a large opening with a diameter of 25 mm. Northern Well in Sweden is the designer of these carabiners and this product line.
