CellaVie® Dog CollagenPlus Soft Treats
— Cell Nutrition for Skin, Bones, and Connective Tissue. Dietary supplement for dogs

Brief Description

CellaVie® Dog CollagenPlus Soft Goodies are the perfect combination of an irresistible treat and highly effective cellular nutrition. With 70% chicken, valuable collagen, and innovative Cell-K30-Nutrition® nucleotides, they specifically support cell renewal in joints, bones, and supple skin. The ideal soft treat for an active and healthy dog's life.

Healthy joints and supple skin—all wrapped up in an irresistible treat

Your dog's connective tissue, cartilage, and joints work hard every day. To remain flexible and pain-free, these tissue structures must continuously regenerate. The problem: For this constant cell renewal, the body needs essential building blocks that are completely missing from conventional treats. Without them, the tissue loses its structure and elasticity over time.

The solution is CellaVie® Dog CollagenPlus Soft Goodies. These tasty, soft treats are far more than just a snack—they're targeted cell nutrition. With 70% chicken (fresh meat and organs), they're exceptionally palatable. At the same time, the addition of 8.5% collagen provides the natural structural protein for cartilage, tendons, and bones.

However, it's the 1.5% Cell-K30-Nutrition® nucleotides that make the real difference: They act as indispensable "builders," ensuring that the collagen is efficiently converted into the body's own tissue and that repair processes can proceed smoothly. Reward your dog not only with premium flavor, but with pure, scientifically backed cellular power.

5 reasons why CellaVie® Dog CollagenPlus Soft Goodies are good for your dog:

- Strengthens joints and bones: The collagen contained in these treats is a natural protein and an essential component of cartilage, ligaments, and tendons, providing long-term support for structure and mobility.
- Promotes elastic skin and healthy connective tissue: The targeted supply of these nutrients naturally helps keep connective tissue and skin elastic and resilient.
- Supports cell regeneration through nucleotides: Nucleotides are the vital building blocks of DNA and RNA; they enable complex repair processes in the skin and connective tissue to proceed quickly and smoothly.
- Optimal protein utilization in the body: While collagen provides the amino acid building blocks, nucleotides act as crucial "construction workers" for protein synthesis, making the nutrients available deep within the cell.
- Irresistible Taste & Soft Texture: With 70% juicy chicken, these treats are a highly popular snack that, thanks to their soft texture, are perfect as a daily treat for dogs of all ages.

Composition & Analytical Constituents

Composition: Chicken (fresh meat, offal) 70%, potato flakes, vegetable glycerin, collagen 8.5%, plant fibers, Cell-K30-Nutrition® nucleotides 1.5%, liver hydrolysate, chicken fat.

Analytical Constituents:

- Crude protein: 26.08%
- Crude fat: 13.26%
- Crude fiber: 0.93%
- Crude ash: 4.78%
- Moisture: max. 25.00%

Feeding Recommendations & Usage

Product information

- Daily Feeding Recommendation: The Soft Goodies can be given at any time as a tasty treat or during training.
- Usage & Special Features: They are most effective when combined with the daily feeding of the CellaVie® Collagen Booster powder mixture. Please always provide your dog with plenty of fresh drinking water.
- Storage: Store in a cool, dry place. After opening, reseal the package tightly to preserve the soft texture and freshness of the treats.
