Currently out of stock.

Product information

Marstall Basic Structure

- Dust-free
- Suitable for people with allergies
- promotes sales
- Highly digestible

Marstall Basis is a nutrient-rich structural feed containing plenty of valuable alfalfa. It is gently chopped, lightly oiled, and molasses-coated. marstall Basis helps build muscle mass and is an ideal roughage supplement, especially for sport and breeding horses.
marstall Basis consists of chopped straw and alfalfa fibers. These palatable roughage components enhance grain-based rations in particular by stimulating chewing. This increases saliva production, which improves the feed’s digestibility. The valuable, protein-rich alfalfa, together with the added molasses and vegetable oil, makes Basis a rich source of crude fiber. Molasses is rich in vitamins, minerals, trace elements, and phytochemicals, while vegetable oil contains valuable omega-3 fatty acids.
This structural feed is ideal for horses in conditioning training, breeding stock, horses with poor feed utilization, or horses with dental problems, hay dust allergies, or fungal spore allergies.
Composition Alfalfa, high-temperature dried (60.00%), cereal straw (barley/wheat) (15.00%), beet molasses (15.00%), rapeseed oil, refined (10.00%) Analytical Constituents and Content of marstall Basis, as well as Energy per kg Crude Protein 10.00% pcv* Crude Protein 64.00 g Crude Fat 15.50% Crude Fiber 26.00% Crude Ash 7.50% Energy (DE)** 10.00 MJ Energy (ME)** 8.80 MJ Calcium 0.90% Phosphorus 0.20% Sodium 0.15% Magnesium 0.20%
Feeding Recommendation

- ... as a high-quality hay substitute Small horse/pony approx. 3.0 to 5.0 kg Thoroughbred approx. 5.0 to 6.0 kg Warmblood approx. 6.0 to 8.0 kg
- ... to enhance the basic forage ration Approx. 1.0 to 3.0 kg base + 6 kg hay
- ... as a textural component to mix into the concentrated feed Approx. 1 to 5 handfuls of Basis
