Color:	black, brown
Equi-Soft Padding:	Lambskin, Anthracite-Black

More freedom of movement and breathing for your horse:
Equi-Soft® pads can be swapped out in just a few seconds thanks to a Velcro system. In addition to lambskin and vachet leather in three different colors, a neoprene pad is also available. The one-size-fits-all girth is available in lengths from 50 to 150 cm. By selecting the correct size, horse owners can ensure that the pads fit their saddle girth perfectly, thereby providing the desired comfort and safety. Leather is an unbeatable material in terms of comfort, durability, and compatibility with horses. Neoprene is a very soft and flexible material that is well-tolerated even by sensitive horses. Even when exposed to sweat, neoprene remains supple and is extremely easy to care for (machine washable at 30°C). Our lambskin pad promotes blood circulation, is breathable, and regulates temperature and humidity in both summer and winter. Additionally, lambskin prevents bruising, scarring, chafing, and pressure sores.
The Equi-Soft pad should only be used in combination with the matching Equi-Soft girth.
