incl. 8,1% VAT plus Shipping

Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Material:	Microfiber
Color:	white

Belt protectors made of long-pile microfiber for loading belts

Microfiber quickly absorbs dust and, above all, moisture, and allows it to evaporate rapidly. This material can be washed as often as needed at temperatures up to 90 °C to effectively combat odors and pathogens. Microfiber is thus a durable and low-maintenance alternative to woven fabrics and lambskins. Please note that you should not use fabric softener when washing.
