Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Size of the bit:	13.5 cm
Thick bridle:	16 mm

The side-branch bit—as the name suggests—is characterized by its sturdy side branches. These side branches offer various advantages and have a specific effect on the horse. The shanks exert lateral pressure on the horse’s cheeks. This aids in lateral guidance and containment of the horse, which is particularly helpful when training young horses. They also provide the rider with more stable control and help maintain a consistent connection with the horse’s mouth. Since the cheekpieces stabilize the bit, pressure on the horse’s mouth can be distributed more evenly and gently. This promotes gentler communication between rider and horse and can help the horse accept the bit more readily and move more relaxed. The pressure on the outside of the bit supports flexion and makes it easier for the horse to understand the rider’s aids.The single-jointed mouthpiece sits more calmly in the mouth than a double-jointed mouthpiece and distributes the pressure across the horse’s jaw; the center joint reduces pressure on the

Product information

tongue. The shanks provide clear lateral stabilization and guidance and ensure that the bit remains in a stable position in the horse’s mouth. Thanks to the small snaffle rings, the action of this bit is more direct.
Advantages at a Glance Effect

- Stable position in the horse’s mouth
- Action on the horse’s cheeks, relieves pressure on the tongue

Mouthpiece

- Made of stainless steel
- Stainless steel is durable, tasteless, and odorless

For which horses is this bit particularly suitable?

- For horses that are still in training
- For horses that require lateral guidance

Note on proper use
Any bit can cause pain if used roughly or improperly. An incorrect size can also be painful for the horse. Feel free to contact us with any questions about sizing and fitting, or read more here about choosing the right size and the correct way to fit the bit in the horse’s mouth.
Widths: Width: 10.5 / 11.5 / 12.5 / 13.5 cm
Ring diameter: 16 cm
Thickness: 16 mm
