Birk Super Digest, 1.75 kg

Super Digest – Optimal Horse Feed for the Horse's Stomach and Intestines A dietary supplement that supports the horse's digestive health . Healthy digestion is crucial for the horse's well-being and performance. Digestive problems can lead to loss of appetite, weight loss, colic, and other gastrointestinal issues that can negatively affect a horse's overall health. Birk Super Digest horse feed was specially developed to promote digestion in horses. It helps maintain normal stomach acid levels and protects the horse's stomach lining. Super Digest also supports the intestines for healthy digestion.
Super Digest has the following five key features

- A unique combination of ingredients gradually buffers stomach acid and restores it to the desired level
- Hydrolyzed live yeast (probiotics) boosts the resilience of the gut flora and contributes to healthy digestion
- Natural prebiotics stabilize the pH level in the gut and promote digestion and nutrient absorption

Product information

- Specially selected herbs support the stomach and intestines
- Essential omega-3 fatty acids from ground flaxseed support digestion and overall health

Formulation
Our Birk Super Digest supplement consists of carefully selected natural ingredients. Its formulation is grain-free, gluten-free, and contains no added sugar. The digestive-supporting horse feed Birk super Digest contains prebiotics and probiotics that promote the balance of gut flora and support healthy digestion. Prebiotics are special types of dietary fiber that serve as food for probiotics. When ingested, prebiotics promote the growth of beneficial bacteria in the horse's digestive tract. This helps maintain a healthy balance of gut flora and improves overall digestion. Another effective dietary supplement for equine digestion is digestive enzymes. Enzymes are responsible for breaking down food and facilitating the absorption of nutrients. In some horses, the production of digestive enzymes may be insufficient, which can lead to digestive problems. Digestive enzyme supplements can help compensate for this deficiency and optimize digestion in horses. For example, Birk Super Digest helps maintain an optimal digestive system and prevent common digestive disorders in horses. Quality and Expertise
Quality is our top priority. All of our BIRK horse feeds are manufactured in certified facilities using strict production processes and quality controls. We take pride in delivering safe and effective products that meet the highest industry standards. Give your horse optimal digestion and a balanced life with our high-quality dietary supplements. Trust our expertise and our commitment to equine health. Order now and give your horse the digestive support it needs!
