- 100% natural semi-moist treat with excellent flavor
- contains 70% delicious and juicy Swiss chicken
- with hemp and naturally occurring CBD
- with green-lipped mussel, turmeric, and devil's claw
- are free of grains and wheat and contain no sweeteners

Net weight: 200g
Joint Fit Snacks – natural support for the musculoskeletal system and mobility

Help support your dog's mobility with SPARROW CannaMove® Forte Joint Fit Snacks. These soft, semi-moist snacks are made from juicy Swiss chicken and potatoes. They contain absolutely no grains, wheat, fillers, artificial additives, or flavorings.
Dogs love the high chicken content, and even picky dogs enjoy and love these treats.
In addition to chicken and potatoes, high-quality ingredients such as hemp, green-lipped mussel extract with glucosamine and chondroitin, African devil's claw, meadowsweet, frankincense, turmeric, and stinging nettle are used.
The innovative Gelenk Fit Snacks help your dog enjoy being active more. This very joy of movement is a fundamental prerequisite for a healthy, species-appropriate, and above all, happy dog life.
Unrestricted mobility also means a zest for life and provides excellent exercise for the muscles as well as for the heart and circulatory system. Furthermore, mobility naturally boosts the metabolism.

Product information

70% juicy chicken from Switzerland

The main ingredient in SPARROW CannaMove® Forte Snacks is 70% protein-rich, low-fat chicken from animal-friendly farms. Dogs love this high meat content because they are primarily carnivores. They can also perceive the umami flavor much better than we humans can. The umami flavor is found primarily in protein-rich foods, such as chicken. Dogs prefer this flavor because it best reflects their nutritional needs.
ANIMALS mean a great deal to us—including farm animals. Switzerland has some of the strictest animal welfare laws and the strictest animal transport laws in the world. This also ensures more animal-friendly farming practices, including free-range and outdoor access, which promote animal well-being. That's why we use Swiss meat.

Swiss Quality – Single Protein

In SPARROW CannaMove® Forte Snacks, we deliberately use only high-quality meat from Switzerland because we care deeply about all animals. Our snacks are produced in Switzerland, and thanks to our innovative manufacturing process, we are able to guarantee the highest quality.
Chicken is the only source of animal protein. We do not mix different types of meat. This follows nature's example, as in the wild, an animal would never consume multiple types of meat at once. The easily digestible, high-quality, and low-calorie potato is the sole source of carbohydrates. We deliberately avoid fillers such as corn, wheat, or soy, and we use only natural antioxidants (natural vitamin E, rosemary) as preservatives.
Thanks to the semi-moist chunks and our innovative manufacturing process, we are able to completely avoid artificial flavor enhancers and other artificial additives or fillers, as our carefully selected, natural ingredients already provide the flavor that dogs love to eat.
We also avoid genetically modified ingredients, and our treats are guaranteed to be produced without animal testing.
Furthermore, we select only raw materials that are sustainable and maintained or grown to high-quality standards.
Your dog will not only love these natural and juicy chunks—they'll also be good for him.

Semi-Moist Dog Treats – Innovative Manufacturing Process

The tasty and juicy ingredients are processed using a special, innovative manufacturing process. This ensures that all the natural and essential nutrients are gently preserved. As a result, SPARROW snacks are a valuable treat for adult dogs, offering maximum bioavailability and excellent digestibility.
Thanks to the gentle cooking and air-drying of the meat, it remains beautifully juicy and flavorful, with a residual moisture content of 20%. This gives the treats a pleasantly soft texture. This gives SPARROW Snacks a natural flavor that dogs love. These semi-moist snacks, rich in meat, are much easier to digest than conventional dry snacks. A daily treat for your beloved dog.
The soft texture and high residual moisture also have the added benefits of reducing tartar buildup and promoting better dental health than conventional dry snacks. Contrary to popular belief, dry snacks do not clean teeth more effectively. The dry chunks tend to get stuck between the teeth and cannot be easily removed by the dog on its own. The dry chunks from conventional snacks can thus lead to more plaque, tartar, and bad breath.
