What is oiled leather?
Oiled leather is vegetable-tanned and retains its natural grain. During the tanning process, it is treated with high-quality oils, making it very soft as well as water- and stain-resistant. This keeps the leather supple, durable, and easy to care for over the long term.

Care Instructions:
Remove dirt with a cloth and treat with appropriate care products as needed. If storing for an extended period, clean thoroughly and store in a bag to protect it from sunlight, dust, and moisture.

Caution:
Avoid prolonged and direct contact with light-colored fabrics, porous surfaces, and other leather.
