Art.Nr.: BoT-2043000 / manufacturer: Back on Track

45,05CHF

incl. 8,1% VAT plus Shipping

Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Color: black

The Back on Track neck guard covers both the atlas and axis vertebrae. Unlike other products, this guard extends beyond the nape of the neck, allowing the Welltex effect to take effect there as well. The neck guard can be used in the stable before training to increase blood circulation in this area. This helps prevent neck tension even before training begins. The Velcro fasteners ensure an optimal fit. The neck guard also features reinforcements on the outer sides where the halter or bit rests against the neck, as well as a strap for attaching it to the halter or throat strap.
Available in sizes S (Cob) and M/L (Full).
