Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Material:	Plastic
Size of the bit:	12.5 cm
Thick bridle:	18 mm

The NATHE water snaffle is back—and it’s come with an upgrade! We’ve replaced the plastic joints with stainless steel and angled them forward by 45°, which prevents pressure on the palate. With single-jointed bits, when the horse takes the reins, increased pressure is applied to the edges of the tongue while the center of the tongue is relieved. The high-quality thermoplastic has a smooth surface, is food-safe, and is free of plasticizers and solvents. In addition, thermoplastic is temperature-neutral, making the bit comfortable for the horse even in cold temperatures.

- Made of high-quality thermoplastic

Product information

- smooth surface, no “eraser effect”
