Delivery **Mon 09. Nov - Tue 10. Nov 2026**

The FURminator deShedding removes loose hair and, with regular use, can reduce shedding by up to 90% over the long term. The deShedding stainless steel edge penetrates deep into the topcoat and gently removes undercoat and loose hair without damaging the coat or skin. The curved comfort edge conforms to the animal’s natural head and body contours. Thanks to the Skin Guard® innovation, the corners of the FURminator are rounded, allowing the brush to glide gently over the skin. The FURejector® push button makes it easy to remove hair from the tool. Ergonomic handle that fits comfortably in the hand.
