Product information

CellaVie® Dog ImmunPlus Soft Goodies
: Cellular Nutrition for the Immune System. Dietary supplement for dogs

Brief Description

CellaVie® Dog ImmunPlus Soft Goodies combine an irresistible treat made from 70% chicken with highly effective cellular nutrition. Enriched with powerful natural ingredients such as krill and echinacea, as well as the innovative Cell-K30-Nutrition® nucleotides, they specifically support the rapid formation of immune cells. The perfect, soft snack for a strong immune system and a healthy, active life for your dog.

The tasty treat for a lightning-fast and strong immune response

A strong immune system is the foundation for a long, vibrant life for your dog. But when pathogens attack the body, millions of new immune cells must be produced in a very short time. For this rapid process, the body needs enormous amounts of specific building blocks that it cannot produce fast enough on its own, even during these times of stress. The immune system slows down.

The solution is CellaVie® Dog ImmunPlus Soft Goodies. These tasty, soft treats are far more than just a snack—they are targeted cell nutrition. With 70% chicken (fresh meat and organs), they are exceptionally palatable. The innovative formula combines the natural power of proven herbs and ingredients such as krill, rosehip, echinacea, and rockrose with 1.5% of the highly effective Cell-K30-Nutrition® nucleotides. These essential building blocks of DNA and RNA act as indispensable aids that enable the immune system to produce new immune cells without delay. Reward your dog not only with the best taste, but also with pure, scientifically proven cellular power for long-lasting vitality.

5 reasons why CellaVie® Dog ImmunPlus Soft Goodies are good for your dog:

- Accelerates the immune response: The nucleotides contained in these treats support the production of immune cells, as the immune system relies on extremely rapid cell division.
- Closes the biological supply gap: Since the immune system cannot produce enough of its own nucleotides to meet its continuous, high demand, this snack provides the crucial external supply.
- Harnesses the concentrated power of nature: Natural immune boosters such as krill, MOS, rose hips, echinacea, and cistus complement the scientifically proven formula perfectly.
- Highest palatability thanks to 70% chicken: With a high proportion of juicy chicken meat and organ meats, these soft treats are an absolute favorite among dogs.
- The ideal everyday companion: Their soft, tender texture makes them the perfect training treat that can be easily integrated into any feeding routine.

Composition & Analytical Constituents

Composition: Chicken (fresh meat, offal) 70%, potato flakes, vegetable glycerin, plant fiber, krill, mannan-oligosaccharides (MOS), rosehip, echinacea, Cell-K30-Nutrition® nucleotides 1.5%, cistus, liver hydrolysate, chicken fat.

Analytical Constituents:

- Crude protein: 20.48%
- Crude fat: 14.16%
- Crude fiber: 1.86%
- Crude ash: 5.18%
- Moisture: max. 25.00%

Feeding Recommendations & Usage

- Daily Feeding Recommendation: The Soft Goodies can be given at any time as a tasty treat or during training.
- Usage & Special Features: They work best when combined with the daily administration of the CellaVie® ImmunPlus powder mixture. Please always provide your dog with plenty of fresh drinking water.
- Storage: Store in a cool, dry place. After opening, be sure to reseal the package tightly to preserve the soft texture and freshness of the treats.
