Product information

Microbiome, Powder, 130 g

Art.Nr.: CE-300425 / GTIN: 7640169832031 / manufacturer:

24,70CHF

incl. 8,1% VAT plus Shipping

Delivery **Mon 09. Nov - Tue 10. Nov 2026**

CellaVie® Dog Microbiome Powder
: Cell Nutrition for the Microbiome. Dietary supplement for dogs

Brief Description

CellaVie® Dog Microbiome Powder is a customized cellular nutrition formula designed to support a stable gut flora and strong immune system. With valuable natural ingredients such as krill, psyllium, and moringa, as well as 15% bioavailable Cell-K30-Nutrition® nucleotides, it specifically supports cell renewal in the intestinal mucosa. Simply mix it into your dog's food daily—for an intact intestinal barrier and maximum quality of life.

Cellular Balance for a Healthy Gut Flora and Strong Immune System

A healthy microbiome is absolutely central to your dog's digestion and immune defense. The intestinal mucosa is constantly at work, requiring intestinal cells (enterocytes) to regenerate extremely quickly. The problem: To support this rapid cell renewal, the body requires enormous amounts of specific building blocks (nucleotides). Since the microbiome itself cannot produce enough of these building blocks, a deficiency often arises during periods of stress, which weakens the intestinal barrier and throws digestion out of balance.

The solution is CellaVie® Dog Microbiome Powder—a highly innovative cellular nutrient that specifically supports the microbiome from the inside out. The formula combines valuable natural ingredients such as krill, psyllium, moringa, and prebiotic building blocks (FOS, MOS) with 15% of the revolutionary Cell-K30-Nutrition® nucleotides. These essential building blocks of DNA and RNA are indispensable for the rapidly dividing enterocytes. They promote the regeneration of the intestinal mucosa, bridge the cellular nutrient gap, and keep the intestinal barrier intact. By ensuring a consistent supply, you can maintain a balanced gut flora and give your dog the best foundation for long-lasting health and well-being.

5 reasons why CellaVie® Dog Microbiome Powder is good for your dog:

- **Promotes a stable gut flora:** Plant-based ingredients like psyllium and moringa naturally possess the best properties for maintaining a sustainable balance in the microbiome.
- **Supports rapid cell renewal:** Enterocytes (intestinal cells) renew themselves particularly quickly; the 15% nucleotides contained in the formula provide the essential cellular building blocks for this process.
- **Strengthens the intestinal barrier and immune system:** A stable microbiome and an intact intestinal mucosa are crucial for smooth digestion and a strong immune system.
-

Product information

- **Closes the nutrient gap in the gut:** Since the mucosa—which is constantly at work—and the microbiome itself cannot produce enough nucleotides, this powder ensures a vital external supply.

- **Targets the good gut bacteria:** With proven prebiotic components such as FOS and MOS, the microbiome is optimally nourished and digestion is gently supported.

Composition & Analytical Components

Composition: Krill, collagen, Cell-K30-Nutrition® nucleotides 15%, psyllium, moringa, FOS, MOS.

Analytical Constituents:

- **Crude protein:** 59.12%

- **Crude fat:** 9.78%

- **Crude Fiber:** 3.15%

- **Crude ash:** 4.19%

Feeding Recommendations & Usage

- **Daily feeding recommendation:** 1 measuring spoon per 8 kg of body weight.

- **Usage:** Simply mix the powder into your dog’s regular food. You can also lightly moisten the mixture with water and then sprinkle it over the food to ensure optimal intake.

- **Special Notes:** Please always provide your dog with plenty of fresh drinking water. A constant supply is essential for maintaining a healthy microbiome over the long term.

- **Storage:** Store in a cool, dry place away from light to preserve the effectiveness of the high-quality ingredients.
