These leather reins from Silver Crown are true all-rounders. The white decorative stitching not only makes them look beautiful, but also serves several useful functions. The fittings are made of stainless steel, a high-quality material that ensures a long service life. The reins attach to the bit with bridle hooks. Otherwise, these reins are made of English leather and feature a non-slip rubber coating on one side. These are very durable reins that you can use for a long time, combining comfort and style.
