S/Power 20 kg, 20 kg

Art.Nr.: O-SPOW.20 / manufacturer: Optimera

39,95CHF

incl. 2,6% VAT plus Shipping

Currently out of stock.

Container Size: 20 kg

S/Power falls into the “Superfiber” category. The non-lignified plant cells are an ideal, high-quality feed for horses and provide a lot of highly digestible energy.

However, this gentle form of energy derived from highly digestible crude fiber does not make horses hyperactive. S/Power can be fed to any horse. Since it does not contain carbohydrates like those found in grain flakes, S/Power can also be used for horses with Cushing’s disease, laminitis, tying up, etc.
The extremely low glycemic response also makes S/Power an ideal feed.

- Highly caloric—for training and competition
- Good supplement for PSSM2/MFM alongside Myostan

Product information

- Electrolyte and water retention
- Ideal for endurance
- For young horses (fewer joint problems, OCD, etc.)
- Sales preparation (preparation for sale or auction)
- Low in carbohydrates and therefore suitable for horses with muscle problems (tying up, PSSM) or metabolic syndrome
- For “hot-tempered” horses
- Ideal for fattening up underweight and/or older horses
- When used together with Preventer, it is extremely effective for treating stomach ulcers and copper poisoning

Please note: You can order a maximum of 1 bag of feed from our online store, as ordering more would exceed the maximum weight limit for package shipping. For larger quantities, please contact us by email or phone!
