Product information

Gastrobal, 20 kg

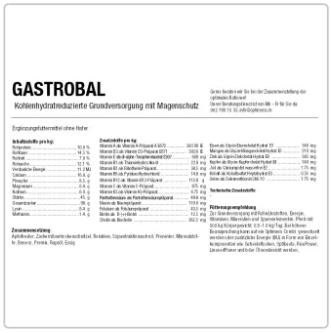

Art.Nr.: O-GASTR / manufacturer:

58,25CHF

incl. 2,6% VAT plus Shipping

Currently out of stock.

Product information

Gastrobal is the balancer that not only provides your horse with the vitamins and minerals needed to meet its daily requirements, but also contains the effective and popular stomach protector Preventer as well as mucous membrane-protecting pectin.

Gastrobal is enriched with high-quality vitamins and minerals using our premix—which is also used in Atlanta, for example—to provide a basic supply of crude nutrients, energy, vitamins, minerals, and trace elements.

Gastrobal is low in carbohydrates and contains no oats, barley, corn, or wheat. It has a moderate crude protein content and can be fed as a diet feed for horses that are easily overfed or overweight.

Gastrobal is also well-suited as a base for single-ingredient feeds and can be mixed into a top-tier sport horse ration.

- Base for customizable sport horse rations
- When fed alone, it serves as an ideal diet feed
- contains the stomach protectant Preventer and pectin
- Very good acceptance
- High-quality raw materials
- Our proven vitamin and mineral formulation with organically bound trace elements

Please note: You can order a maximum of 1 bag of food in our online store, as ordering more would exceed the weight limit for package shipping. For larger quantities, please contact us by email or phone!
