incl. 2,6% VAT incl. Shipping

Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Container Size: 6 kg

Frey Horse Dynamic POWER PLUS +Magnesium +Lysine is a dietary supplement for horses designed to support periods of intense activity, recovery, and the targeted development of body mass. The balanced formula combines magnesium with lysine, thereby supporting horses during training, peak seasons, and periods of increased exertion.

The formulation was developed for horses that are physically challenged or prone to nervousness and internal tension. Magnesium is essential for nerve and muscle function, while lysine, as an essential amino acid, plays a key role in the development and regeneration of muscle tissue. This results in nutritionally balanced support for performance, balance, and muscle development.

- **For sport horses** during intensive training and competition phases

Product information

- **For nervous or stressed horses** with increased magnesium requirements
- **Contains highly bioavailable magnesium** for targeted supplementation
- **With lysine** to support muscle development and body mass
- **Suitable for build-up and recovery phases**
- **6 kg container** for convenient storage

The need for certain nutrients can increase, especially during periods of high physical exertion, growth, training, or seasonal activity. Frey Horse Dynamic POWER PLUS +Magnesium +Lysine is formulated to meet these needs with a clear, functional recipe. It integrates well into existing diets and is suitable for horses where balance and muscle quality are the primary focus.
