Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Color: black

Certified safety, 100% made in France.

The FREEJUMP AIRBAG is a protective vest specifically designed for equestrian sports to protect the rider's vital areas in the event of a fall. It can be worn over a thin layer of clothing (T-shirt, sweatshirt, or light sweater) or over a jacket.

The FREEJUMP AIRBAG is the first equestrian airbag to be certified according to this standard. It reaches the required pressure and fully inflates for optimal protection in just 98 milliseconds (for size S), which actually exceeds the standard's requirements. In addition to meeting safety standards, the FREEJUMP AIRBAG stands out for its ability to absorb horizontal impacts while simultaneously providing exceptional protection against longitudinal impacts along the spine.

Optimized protection zone.
The FREEJUMP AIRBAG offers optimized protection for the neck, back, lumbar spine, sacrum, pelvis, and thorax. It accounts for the use of a certified riding helmet and incorporates a stabilizing neck support to protect the spine and vital areas.

Protection for the neck, thorax, and back is tailored to each size and ensures coverage of 24% of the chest circumference, 100% of the waist-to-shoulder length of the thorax, 20% of the chest circumference, and 120% of the waist-to-shoulder length of the back.

A lateral protection feature ensures perfect alignment of the torso. The spine, pelvis, hips, and vital organs receive enhanced protection through two torso lengths for sizes XS, S, M, and L—available in both regular and long versions.

Comfort and performance.
The FREEJUMP AIRBAG is made from silky Italian fabrics with perforated sides and offers exceptional comfort and breathability. The tailored cut and design, combined with flexible materials, ensure optimal protection and maximum comfort.

The seat belt is equipped with a fabric loop to prevent noise when it comes into contact with the safety lanyard's carabiner.

Compatibility.
The FREEJUMP AIRBAG is designed to be worn both over and under a compatible garment. The NF S-72-800-2022 standard requires an official compatibility test by CRITT for all garments worn over an airbag. The FREEJUMP AIRBAG has been tested by CRITT to ensure its compliance and safety.

Pending a possible update to the standard as part of European harmonization, FREEJUMP guarantees that all clothing certified to NF S72-800-2022 that is compatible with airbags from other brands is also compatible with the FREEJUMP and PÉNÉLOPE AIRBAG.

The FREEJUMP AIRBAG is guaranteed to function properly with any compatible garment, provided that the safety cord exits the bottom of the garment (and not through a hole specifically designed for that purpose).

To ensure maximum protection and optimal comfort for the rider, the FREEJUMP apparel collection—including the MONA and MAX show jackets, the KLOE and KARL sleeveless down jackets, the MADDY and MATT rain jackets, and the MALLORY hoodie, specifically designed to be compatible with the FREEJUMP AIRBAG when worn underneath. These garments are made from durable and stretchy fabrics that allow the clothing to return to its original shape after inflation.

The FREEJUMP AIRBAG is also compatible with models from numerous other equestrian apparel brands. These include: PIKEUR, VESTRUM, PÉNÉLOPE, KERRITS, JUMP'IN, STRUCK, SCHOCKEMOHLE SPORTS, EAST, TOMMY HILFIGER, VISION APPAREL, GEM, and CAVALLO.

Sizes and Custom Fit.
The FREEJUMP AIRBAG is available in children's sizes CHILD S and CHILD L, as well as in adult sizes from XXS to XXL. For sizes XS through L, there are two length options: regular and long (indicated by a "T" in the size designation) to ensure a perfect fit even for taller individuals. The long version of size XS would therefore be size XST.

The children's sizes CHILD S and CHILD L are suitable for children weighing at least 25 kg and measuring at least 130 cm. Starting with size XXS, the FREEJUMP AIRBAG is suitable for people who are at least 1.45 m tall and weigh at least 35 kg.
