Product information

Thick bridle:	15 mm
Material:	Plastic

The Trust brand Inno Sense 3-Ring Flexi Soft bit features metal cheek pieces and a soft plastic mouthpiece. The 3-ring bit is a very sharp bit with significant leverage, making it suitable for very strong horses. Due to its direct and strong effect, it should only be used by experienced riders. As a general rule, the lower the reins are positioned, the stronger the leverage becomes. The mouthpiece is a flexible rod consisting of a metal core covered with a plastic sheath. The plastic contains no plasticizers and is non-toxic to both humans and animals. Due to the soft texture of the mouthpiece, it is very well accepted by most horses and is also suitable for horses with sensitive mouths. Note: Since the material is soft, signs of wear from the horse’s teeth may occur. These do not constitute a quality defect.

- Strong leverage
- Ring diameter: 8.0 cm
- Flexible mouthpiece
- No plasticizers
