Sparkle in the Saddle

For the new glamorous version of the popular riding helmet series, the uvex suxxeed diamond, uvex collaborated with the designers at **Swarovski®** to create a **starry sky made of diamonds**: On **a satin finish,** multicolored **Swarovski® crystals** and **pearls** sparkle in competition with one another. The color palettes of the **glittering elements** are coordinated with the helmet's color: clear, anthracite, and dark tones on the black helmet, and various shades of blue and violet on the blue version. A unique design

Product information

developed **exclusively for uvex**. The new suxxeed diamond—because riding without a little sparkle just isn’t the same!

The classic design of the uvex suxxeed glamour is what makes this helmet so successful and popular across all disciplines. Impact-resistant on the outside, shock-absorbing on the inside. The helmet features uvex climate control inside the shell, which keeps your head cool at all times. With the uvex Monomatic comfort closure, the R-FAS strap system, and the IAS 3D size adjustment, the helmet can be adjusted to the shape of the head in multiple dimensions with millimeter precision. In addition, the uvex-designed interior lining—developed specifically for riders—is moisture-wicking, removable, and washable.
