From natural marine sources

Glucosamine is a dietary supplement for horses, dogs, and cats used to treat osteoarthritis and other joint diseases.

- Protects the cartilage tissue in the joints from further
breakdown - Prevents joint diseases and keeps your pet healthy -
Relieves pain -

Product information

Improves joint
mobility and lubrication

Glucosamine contains important amino acids that support the stability and elasticity of ligaments, tendons, and cartilage. Glucosamine can be used as a preventive measure.

Older animals, in particular, often develop osteoarthritis. Pain relievers are frequently prescribed, but these can undoubtedly have negative effects on health with long-term use.
Furthermore, they only treat the symptoms and not the cause of the disease. Unlike pain relievers and anti-inflammatory medications, glucosamine can be taken over a long period of time because it occurs naturally in the body. There is no risk of dangerous long-term side effects

Contents: 100% pure glucosamine HCl (powder), measuring spoon (5 g)
