CellaVie® Dog DentalCare Soft Goodies
: Cell Nutrition for Teeth. Dietary supplement for dogs

Brief Description

CellaVie® Dog DentalCare Soft Goodies are the perfect combination of an irresistible treat and cellular dental care. With 70% chicken, refreshing herbs like peppermint and parsley, and innovative Cell-K30-Nutrition® nucleotides, they promote gum regeneration and stimulate the production of protective saliva. The ideal soft treat for clean teeth and fresh breath.

Dental care and fresh breath in one irresistibly soft treat

Your dog’s oral mucosa and gums are exposed to countless germs and bacteria every day. To overcome this challenge and stay healthy, the oral tissue must regenerate extremely quickly and continuously. This process requires enormous amounts of cellular building blocks. Without them, the tissue loses its resilience, saliva production slows down, and harmful acids can attack the tooth enamel unchecked.

The solution is CellaVie® Dog DentalCare Soft Goodies. These tasty, soft treats revolutionize dental care by combining pure enjoyment with highly effective cellular nutrition. With 70% juicy chicken (fresh meat and organ meats), they are highly palatable. The clever formula combines breath-freshening herbs like parsley and peppermint with natural seaweed, collagen, and 1.0% of the innovative Cell-K30-Nutrition® nucleotides. These essential DNA building blocks not only accelerate tissue regeneration but also specifically stimulate saliva production. The increased saliva helps keep teeth clean naturally and neutralize harmful acids. Reward your dog with the best taste and support his dental health with every bite.

5 reasons why CellaVie® Dog DentalCare Soft Goodies are good for your dog:

- Promotes clean teeth and fresh breath: A natural herbal blend of parsley, peppermint, and seaweed offers the best properties for caring for the gums and freshening breath.
- Accelerates the regeneration of oral tissue: The nucleotides contained in the treats are the essential building blocks of DNA and RNA and support the rapid renewal of gums and oral mucosa.
- Stimulates protective saliva production: The nucleotides promote active saliva flow, which is crucial for keeping teeth clean and neutralizing acids that attack tooth enamel.
- Makes the gums more resilient: Since the oral flora is constantly exposed to germs, the continuous external supply of nucleotides sustainably strengthens the local immune system in the mouth.
- Highly palatable as a daily treat: With 70% fresh chicken meat and offal, these soft treats are an absolute highlight that can be easily integrated into your dog’s daily routine.

Composition & Analytical Constituents

Composition: Chicken (fresh meat, offal) 70%, potato flakes, vegetable glycerin, plant fibers, seaweed, parsley, peppermint, collagen, Cell-K30-Nutrition® nucleotides 1.0%, liver hydrolysate, chicken fat.

Analytical Constituents:

- Crude protein: 20.03%
- Crude fat: 13.40%
- Crude fiber: 1.55%
- Crude ash: 5.66%
- Moisture: max. 25.00%

Feeding Recommendations & Usage

- Daily Feeding Recommendation: The Soft Goodies can be given at any time as a tasty treat or during training.

Product information

- Usage & Special Features: They are most effective when used in combination with the daily administration of the CellaVie® DentalCare powder mixture. Please always provide your dog with plenty of fresh drinking water. A consistent supply is ideal for preventing dental problems.
- Storage: Store in a cool, dry place. After opening, be sure to reseal the package tightly to preserve the soft texture and freshness of the treats.
