Product information

Stirrups, Air Pure

Art.Nr.: FJ-F03580 / GTIN: 3666550525898 / manufacturer:

325,00CHF

incl. 8,1% VAT incl. Shipping

Currently out of stock.

Comfort, stability, and superior grip.

The AIR'S stirrup features a traditional design thanks to its stainless steel frame. Its technical features, such as Freejump Shock Absorption Technology and the ability to adjust the suspension alignment and the angle of the footplate, ensure exceptional comfort and perfect stability.

The footplate of the AIR'S stirrup offers excellent grip thanks to Super-Grip. The integration of carbon fiber guarantees exceptional durability. The removable steel studs enhance the anti-slip effect and ensure extended durability.

Technology and Safety.
The tread of the AIR'S stirrup incorporates Freejump Shock Absorption technology, which combines an elastomer sole with a mechanical joint for optimal shock absorption. This creates a true “air cushion” effect and ensures exceptional comfort.

The polyamide upper strap of the AIR'S stirrup is designed to release under high pressure, allowing for quick foot release when needed. This strap is easily replaceable.

Adaptability to the rider’s needs.
The AIR'S stirrup offers four technical options to best meet the needs of every rider. The eyelet can be rotated 30° or straight, and the footplate can be flat or inclined at a 10° angle. The angled eyelet makes it easier to step into the stirrup thanks to its 30° orientation, while the straight eyelet, parallel to the footplate, encourages an inward-facing toe alignment. The off-center positioning of the main stirrup allows for a shifted center of gravity, which facilitates a natural lowering of the heels.

Personalization and differentiation.
The AIR'S stirrup can be customized for a unique look. You can personalize the decals, the upper strap, the footplate, and the shock absorber by choosing from a range of colors and flags.

The traditional design of the AIR'S stirrup makes it suitable for use in all disciplines, including dressage. The FULL BLACK version of the AIR'S stands out for its more classic look.
